

The Golden Path of the Jedi

Contributed by Nelson Templar
Monday, 01 February 2010

I am a Jedi, my name is Valen.

Here is my basic teaching of the Golden Path of the Jedi, I hope that it helps you to walk more firmly upon whatever spiritual path you have chosen for in this life.

As the teachings of the Jedi grow in the world, it means the end of all separateness between peoples. It means an end to barriers. It means an end to racial, class, color, gender, and religious distinctions, for we gradually learn that we all carry the Light of the Universe inside of us. And that the part that enshrines us in no way contradicts that portion that is precious to others.

So out of the apparent confusion the pattern takes shape, and harmony and peace come. I tell you these things so that we can understand the part that we choose to manifest in this lifetime that plays in the spiritual evolution of the world, and the part that each one of us must play in that evolution as history runs its course.

The truth of the Universe abides forever. Yes, we see confusion and chaos, but this dissipates as the clear Light of the Universe penetrates. And that Illuminating ray is growing in strength.

Darkness is replaced by Light. Ignorance is replaced by Knowledge. Superstition is replaced by Wisdom. We are Jedi, Guardians of the Light. It is good; we have a path that we can tread. We are not helpless, there are signs of encouragement. We are free and we know where our freedom will lead.

Our purpose is to seek and to reveal truth, knowledge and wisdom.

We demand nothing that is contrary to intelligence. We seek to reveal that which elevates the whole of humanity and gives a true concept of position in life and in the Universe, a true concept of relationship to ourselves and an understanding of kinship with all the members of the vast Universal family.

We Jedi, appeal to the highest and best instincts. We only seek to dispel illusion and to bring the truth that is prized. We restore Reason. We replace Illusion with Truth, Superstition with Knowledge, Darkness with Light so that those who are helpless may become whole again, so that those who are tired may become refreshed, so that those who suffer may become free.

We reveal these truths not only as they are known in their relation to the sacred laws of the Universe. Those who serve are accounted as great ones by us, and the service that they render is not confined to helping the soul to find truth, for there is other services being rendered. There is the service for aiding those in pain, the service of speaking up for equality and responsibility in all actions, the service of preserving freedom, and the service of dispelling fear and giving the spirit in each of us a chance to express itself as the Universe, desires that it should.

There is a world of happiness, light and plenty. The Universe provides everything, as obstacles are swept away.

We can do it. We can allow the Light to flow, all we have to do is allow it to work through us. Let us demonstrate in our own lives that we know the things of the Universe because the power of Light is in us. The teachings of the Golden Path of the Jedi, and how they work lie within us. If we can bring happiness where there has been sadness, knowledge where there was ignorance, then we have done service. We have a responsibility in our lives to try to inspire others to live so that they may know that Light flows through them.

As we possess this knowledge of the Light within us we strike a balance. We have something that cannot be measured. We have the realization that our souls are all intertwined with the cosmos. We have learned how to respond to the vibrations of the messages that the Light sends to guide us. In this environment the illusions of fear cannot continue. We help to give birth to the New World of Peace. We find that the knowledge that we have gained and the wisdom that we have learned are of great value.

We do not judge anything by the apparent result. We see with the eyes of Light; we know that in every child of humanity there is Illumination.

We grow as we release our illusions. We examine the foundations of personal and spiritual collective truth. The Truths of the Universe are emerging and we are building the foundations for a New World of Peace. The nearer Peace gets the more the world will realize the beautiful gift we as Jedi bring to Enlighten Humanity.
